Space Industry

The Space Industry represents one of the most exciting areas for commercial opportunity for Australia - across both civilian & military disciplines.

LCC has built its investment banking & consulting practice in this area as a part of its continual focus on "engineering innovation". We are already seeing commercial models developing in a variety of thematics including:

- Vehicle design
- 3D printing & its application in the space environment - including habitats & vehicle manufacture
- Technology solutions for weather observation, image capture & communications / data efficiency
- Space logistics including earth to space cargo transition & in space operations
- Surveillance solutions & military applications
- In orbit waste management & payload return
- Rocket engines & propulsion alternatives
- Biosciences & pharmaceutical development in space
- Nanosatellite development & deployment
- Launch Infrastructure

LCC's commitment to the Space Industry is further reinforced via its Seed & Pre Seed Investment Program via **Exosphere Ventures** - www.exosphere.ventures

Nothing Replaces Experience, Knowledge & Resources

LCC Asia Pacific supports high growth clients through the delivery of independent, commercially oriented, "horizon focused" advice. Critical to the role we play is the value of decades of experience in working with companies large & small, which delivers options, insights and knowledge which allows the Client to make better quality decisions in the fast paced environment in which they operate.

We also support the capital provider industry exploring their investment options in the rapidly growing Space Sector. Our work often involves the identification of "needle in the haystack" opportunities that private capital is disciplined in investing in.

A key point of difference is our ability to understand the operational challenges & associated constraints that high growth entrepreneurs face in their business models. This is a direct result of a combination of decades of working with "engineering innovation" companies and our focus on servicing specific sectors. Knowledge and experience allows us to move quickly and with confidence - drawing on a vast number of historic experiences in combination with real time research to provide our clients with clear & concise advice. We are sector specialists - not "generalists".
