CORPORATE FINANCE & STRATEGIC ADVISORY

# Private Capital M & A Strategic Advisory

Renewable Energy & Renewable Energy Technology

**The Renewable Energy Sector in Australia is only just at the beginning of its growth path. LCC anticipates that over the next 5 years the growth in both renewable energy projects and associated technology will prove to be a dynamic sector for both M & A activity and investment.**

We have helped developers from the very earliest stages of their project development to navigate the complex regulatory & EIS requirements in order to deliver a successful project. This has given us a unique understanding of both the challenges of today's operational environment & the opportunities of tomorrow.

We support clients that are seeking to grow their business models via both corporate finance & strategic consulting engagements. Opportunity areas that we project will attract high levels of deal activity include:

- Solar Farms, Onshore & Offshore Wind & Battery Energy Storage Systems
- Alternate generation strategies including Thermal, Pumped Hydro & Biomass
- Specialist Engineering Firms spanning design, planning & construction
- Specialist OEM products
- EPC & Construction Services
- Commissioning & Decommissioning Expertise
- Predictive maintenance services players - including technology led
- Optimisation software & data solutions ranging from Bidding through to Energy Optimisation
- Specialist data & communication solutions including both terrestrial & satellite

## **Nothing Replaces Experience, Knowledge & Resources**

**LCC Asia Pacific** supports high growth clients through the delivery of independent, commercially oriented, "horizon focused" advice. Critical to the role we play is the value of decades of working with companies large & small, which allows us to draw on experience in approaching client engagements - providing options, insights and knowledge which allows the Client to make better quality decisions in the fast paced environment in which they operate.

We also support the investment industry exploring their portfolio options in relation to the Renewable Energy Sector. We assist in identifying & originating "needle in the haystack" opportunities.

**A key point of difference is LCC's ability to understand the operational challenges & associated constraints that both entrepreneurs & public companies face in their business models.** This is a direct result of a combination of decades of working specifically with "engineering innovation" companies. Knowledge and experience allows us to move quickly and with confidence - drawing on a vast number of historic engagements in combination with real time research to provide our clients with considered option. **LCC delivers specific insights and not general & unstructured thoughts.**
